— Company Vision

1

To become the technological center of Miyatsu Group, MVN will delve into technologies as well as expanding on our current system development capabilities.

2

Perform R&D to breach into AI projects and collaborate with local universities and appear at tech events to attract talented, high-spec engineers.

3

Increase the quality and efficiency of management. Our senior staff continually seeks to improve performance via professional development training.

4

Refine basic skills in web development, application development, design and creative content to maintain a competitive edge as well as foster a closer, more familial company culture.

5

Continue our consistent, productive communication with clients. Customer relationships will remain of paramount importance to us.

Who we are

We are Vietnam's leading software development group, undertaking Fintech, Blockchain & AI projects.

We take an uncompromising approach to performance and project quality. Our team is dedicated to mastering all facets of the industry and we're constantly experimenting in pursuit of this.

But above all, we take deep pride in forming unique, lasting relationships with our clients all over the world.

Holiday: **twice/year** (Summer holiday & Winter trip).

Where We're Going

As rewarding as it is for Miyatsu to be the development industry leader in Vietnam – we're not content to stay where we are. We're determined to master new technologies and expand globally. And if our skills and track record are any indication, it won't be long until the Miyatsu brand attracts more clients to the country.

Our next initiative is to position our host city of Hanoi as a new hub for software and Fintech projects. And that's just the beginning. We've begun R&D on the AI & Augmented Reality projects that will make us a complete tech solutions company, based right here in Vietnam. We're excited for the future – and we welcome you to join us.

—
Director
Joshua Riordan

“ I am honored to share the office with my staff, who have made Miyatsu a high-performance software development company with a passionate commitment to customer satisfaction. Our mission is to provide our clients with exceptional products and technical support.

We are growing quickly, and have recently overhauled our recruitment and professional development programs so that we may continue to surpass industry standards.

I'm proud to say we have built up significant momentum in our quest to transform traditional development expectations - but there is still more to be done. I hope that my enthusiasm will inspire you to join us as we continue to innovate here at Miyatsu.

Joshua Riordan
